

## Irymple Structure Plan and Urban Design Framework Review

Mildura Rural City Council is working with Mesh Planning to prepare an updated Structure Plan and Urban Design Framework (UDF) for Irymple.

The precinct study area is bounded by Sandilong and Morpung Avenues, and Fourteenth and Sixteenth Streets.

This project will update the long-term vision and action plan for Irymple. It will guide future changes to land use, built form and public spaces, and prepare a town centre plan to provide clear actions for public realm improvements, design guidelines and development facilitation.

The Structure Plan will be used to update relevant aspects of the Mildura Planning Scheme, and ensure Council's decision-making achieves enhanced economic, social and environmental objectives for the next 15 years.

As part of the first stage of the project, Council would like to hear from Irymple residents and visitors regarding what is important and valued, and what they want the town vision to be.
