

# CBD Access and Mobility Strategy

Following the recent adoption of the CBD Plan 2020-2035, Council has appointed the Institute for Sensible Transport to prepare a CBD Access and Mobility Strategy.

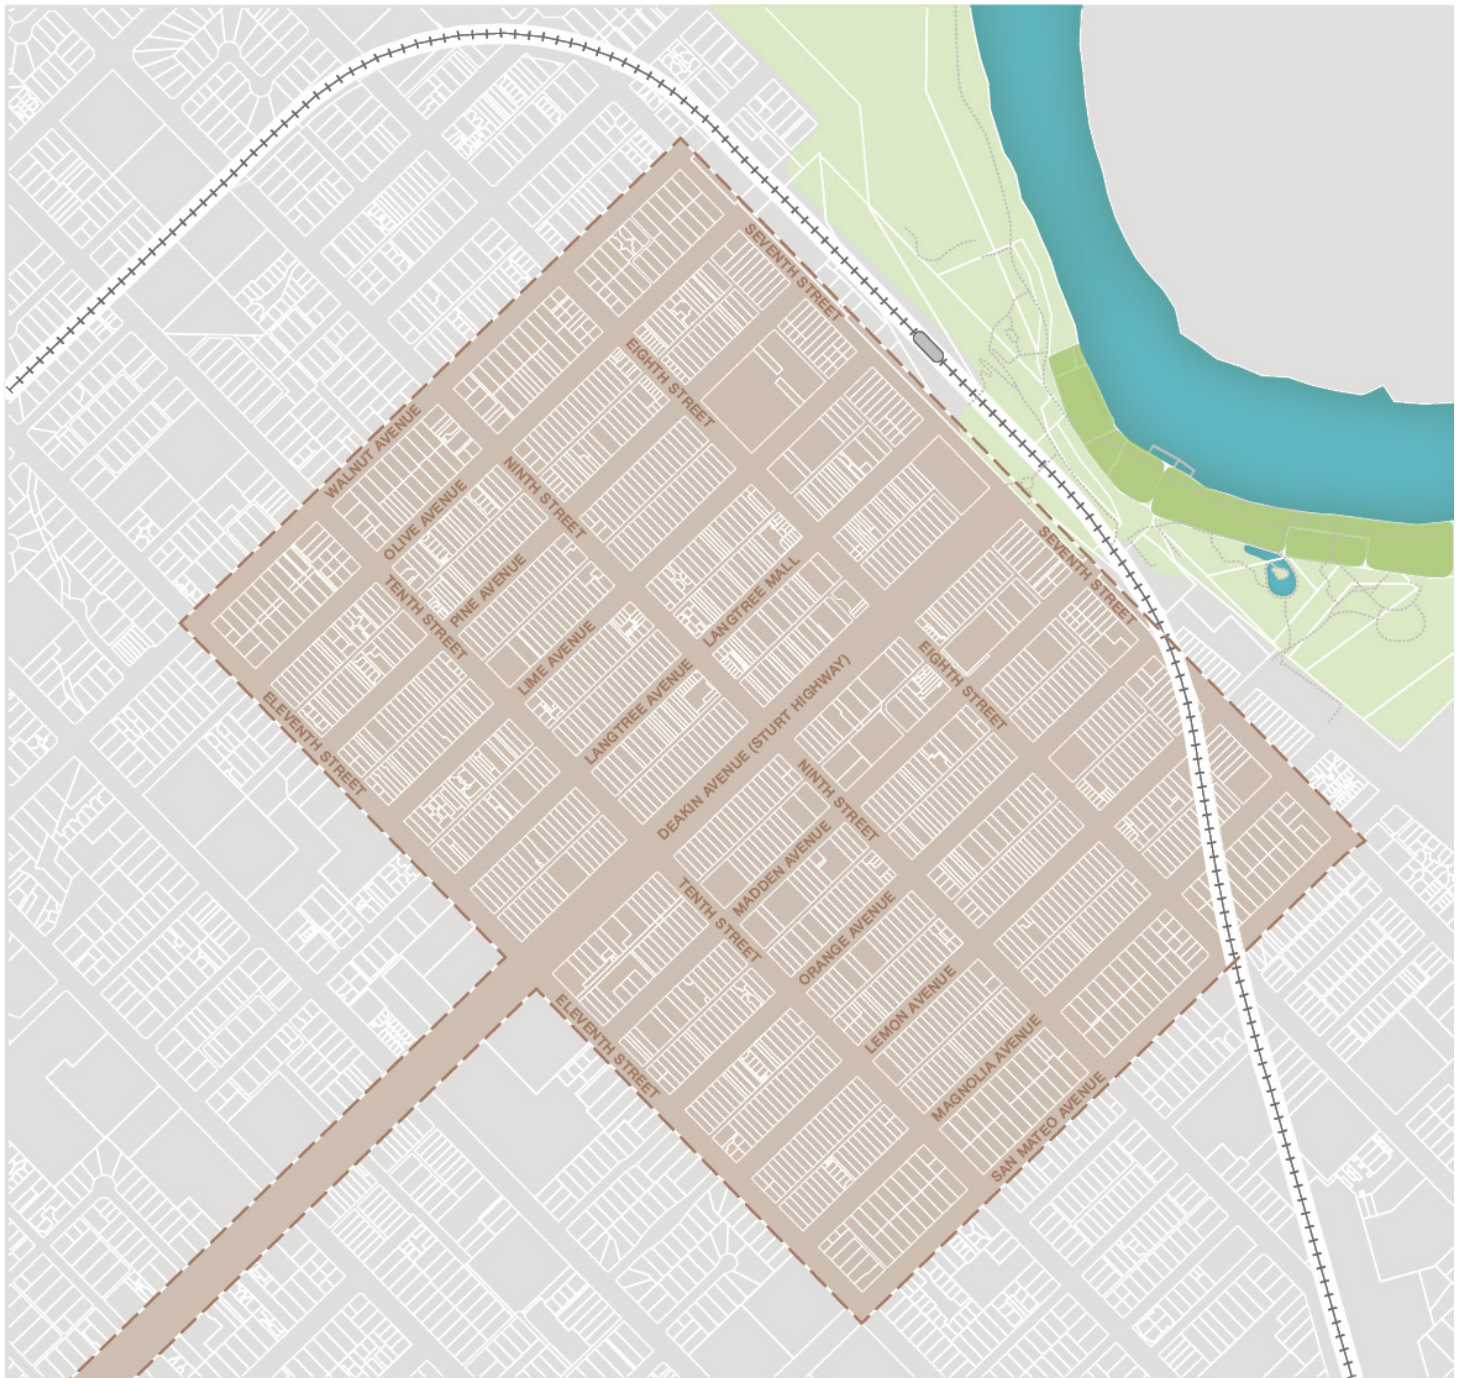

In addition to consultation with key local community groups and stakeholders, Council is also keen to hear from the broader community about how we improve accessibility to, and around, the CBD.

A better approach to car parking supply and timed controls will also be investigated.

To enable this input in line with COVID-19 restrictions, a Community Survey will commence online from Monday 2 October 2020.

To participate in the survey visit
