

Changes to Waste Services during the Fire Danger Period

During the Fire season which is from November to April each year, the Victorian community is advised of a fire danger rating. The ratings help show when the conditions are dangerous for a bushfire. Ratings range from Low-Moderate through to Code Red.

Council has implemented changes to Waste Services on days declared as Extreme and Code Red. This is to ensure the safety of Council staff and its contractors, and to meet Environmental Protection Agency Victoria’s regulatory requirements for the management of landfills and transfer station sites during these weather conditions. Changes include:

Fire Danger Declared Day – Extreme:

- Landfill and Transfer Stations will still operate. However Council reserves the right to make a decision to close these sites should this be required due to conditions on the day; and
- Kerbside, litter and street sweeping services will still be provided. However Council reserves the right to make a decision to defer these services to another day should this be required due to conditions on the day.

Fire Danger Declared Day - Code Red:

- All Council Landfill and Transfer station sites, including Mildura Landfill will be closed; No kerbside, litter, street sweeping or any waste services will be provided.

If kerbside services are impacted by an Extreme or Code Red declared days, collection of kerbside bins will occur on the following Saturday. Council will communicate any changes to services to the impacted local communities. Residents can also call our Customer Service Centre for information. Please phone (03) 5018 8100.

Fire Danger Rating – Operational Days

Areas	Days of Operation	Code Red	Extreme	Severe	Total Fire Ban
